THE THERMOMETER AND THE THERMOSTAT

There are two instruments which furnish excellent illustrations of two philosophies of life, the thermometer and the thermostat. The thermometer records the condition of its environment and adjusts itself to it.

The thermostat, an instrument which is becoming increasingly important, regulates its environment, in contrast to the thermometer.

The first philosophy of life, illustrated by the thermometer is to adjust yourself to your environment. For ages man has been trying, in the main, to follow this method of the thermometer. "When in Rome do as the Romans do" is a saying of those who follow this philosophy. Be like the chameleon, a lizard which takes its color according to the object surrounding it. People who have the thermometer philosophy scorn genius or any who say, "Let us change conditions about us rather than adapt ourselves to conditions whether right or wrong."

There are doctors in the profession who go on through the years with little addition to the instruction they received while in school. They are content to do as other doctors do, with no new thoughts of their own. Many fail to grasp some new thought or teaching simply because they follow the philosophy of the thermometer.

The thermostat, on the other hand, regulates its environment. Many have experienced a summer ride in a railway coach with no heat regulator, and then have travelled in an air-conditioned car in great comfort, regardless of the outside heat. With the thermostat it is possible to turn the dial and obtain the desired degree of temperature. Persons who follow the thermostatic philosophy can set before themselves certain ideals and proceed to realize them. Such people in any profession are the great pioneers and reformers. They have ideals and create an environment in which all can live in peace and comfort.

THERMOMETER - ADJUSTS - CONFORMS - PASSIVE.

THERMOSTAT - REGULATES - TRANSFORMS - ACTIVE.

A.I.Ludlow

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year.
